

Cozad 110T Pentuple 16

Cozad 110T Pentuple 16

Trailer Capacity:

110 short tons

220,000 lbs

99,790 kg

Trailer Weight:

114,100 lbs

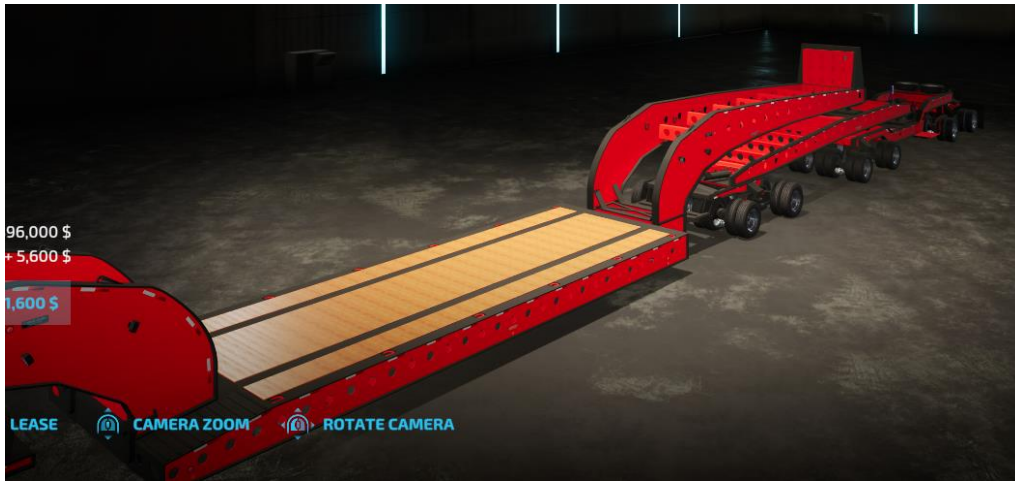

51,755 kg

This trailer is the Cozad 110T that Jordy and I made for FS19. It has been updated for FS22. Options include color selection, multiple flag options, flood light options, deck length extension options, jeep to forward bridge attachment point position.

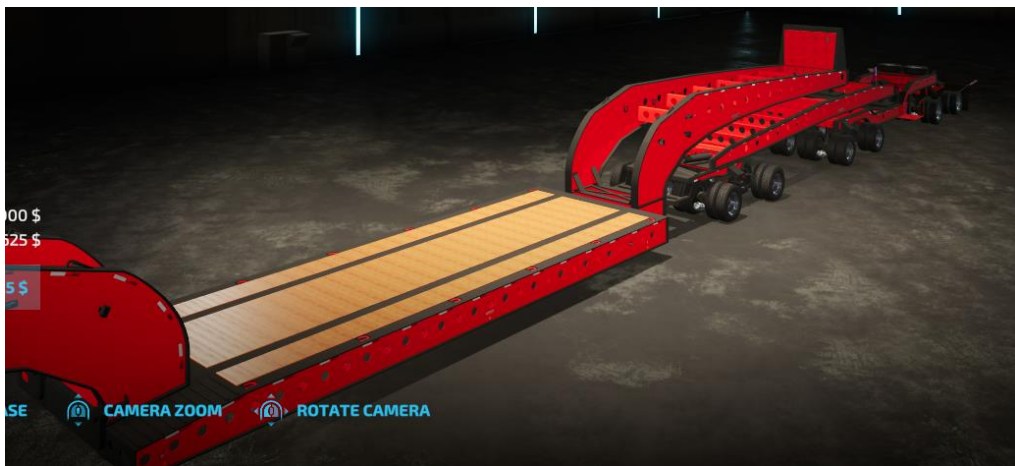

Cozad 110T Pentuple 16

Flag Options:

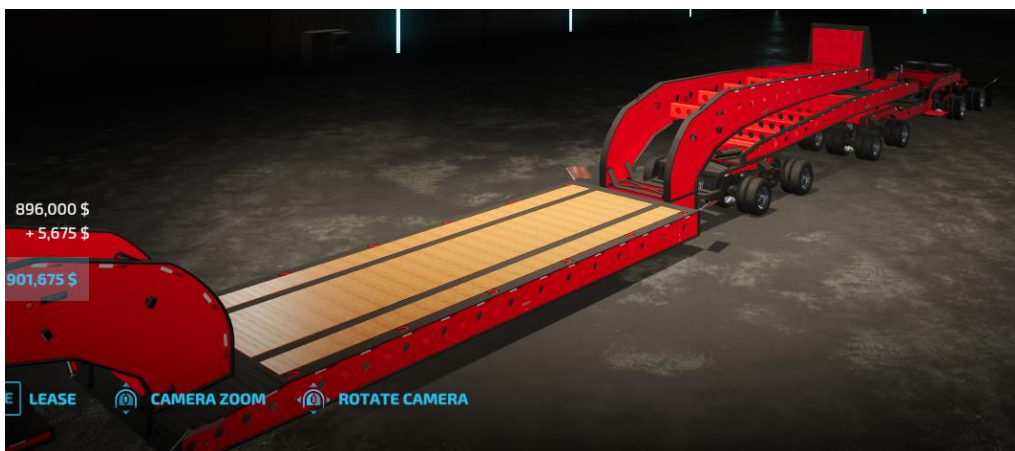

None

Rear

Rear and Sides

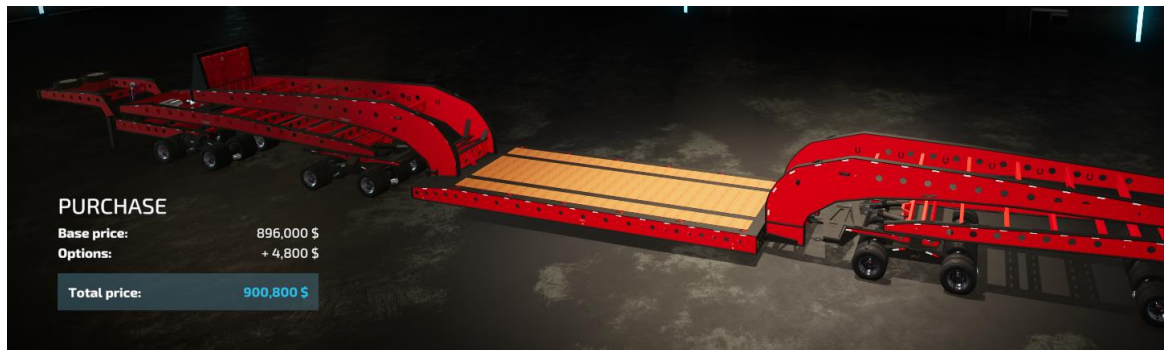

Cozad 110T Pentuple 16

Flood light options:

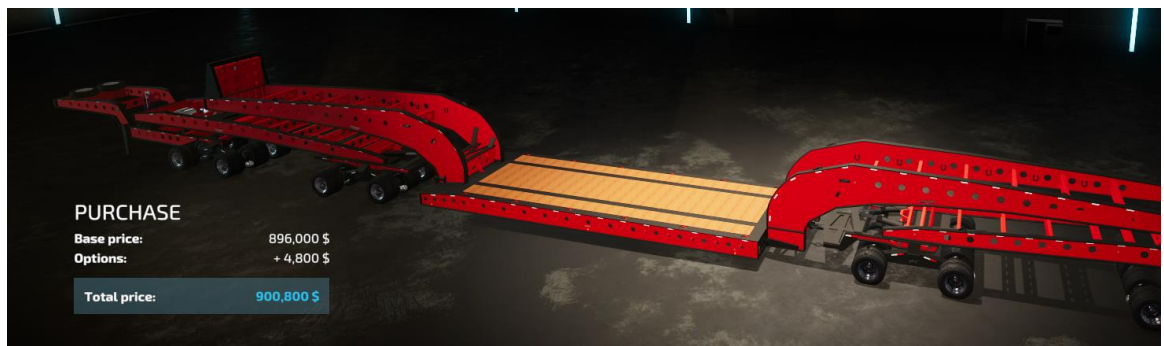

None

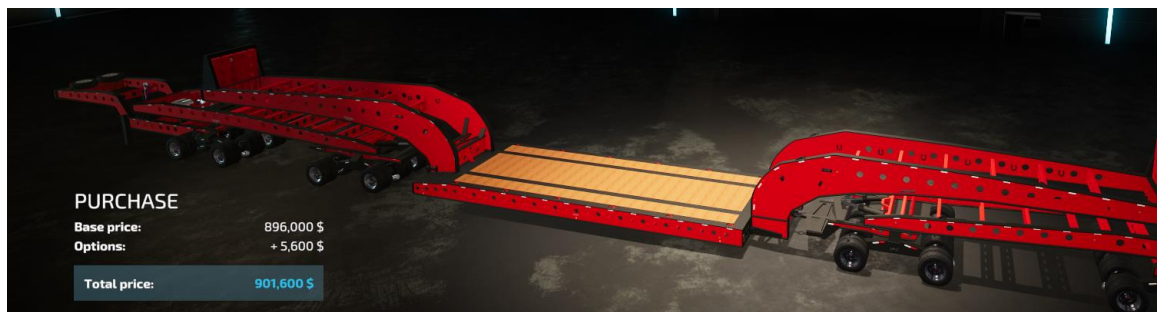

Front

Rear

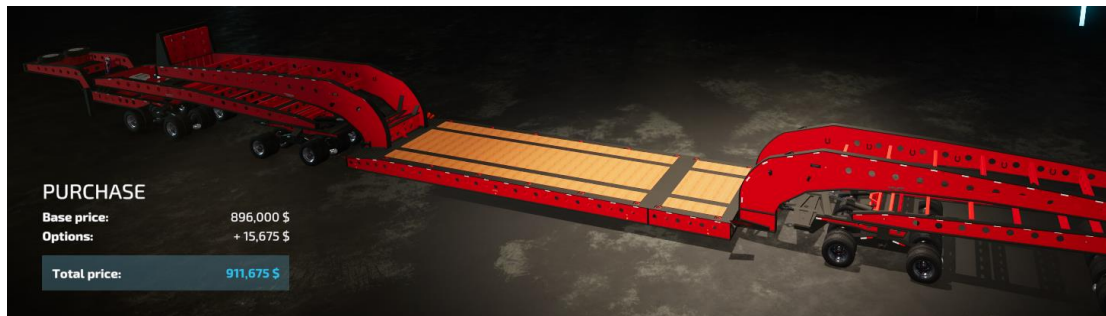

Both

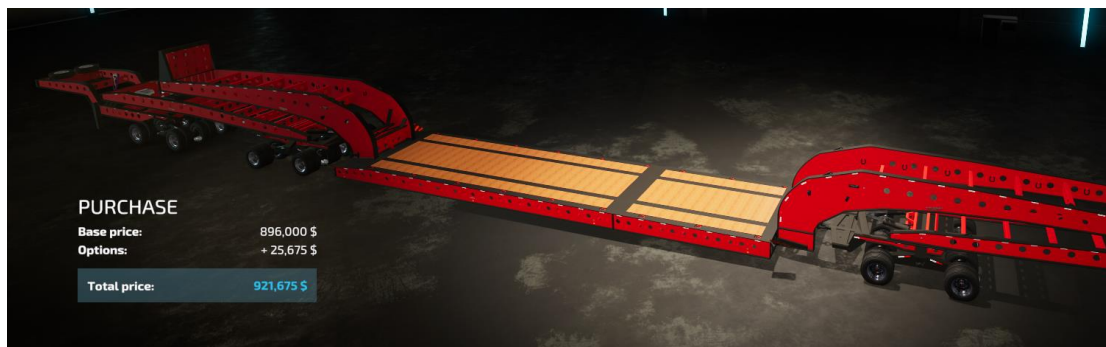

Cozad 110T Pentuple 16

Deck Length extension Options:

7 feet

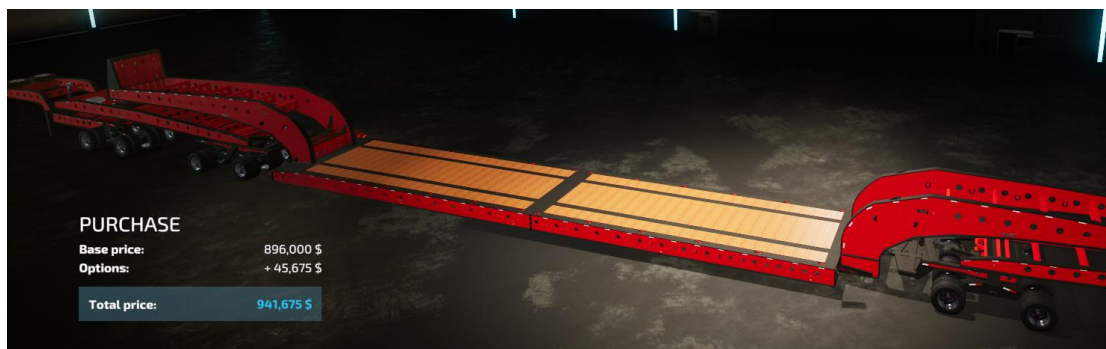

14 feet

21 feet

28 feet

Cozad 110T Pentuple 16

Jeep to Forward Bridge connection position options:

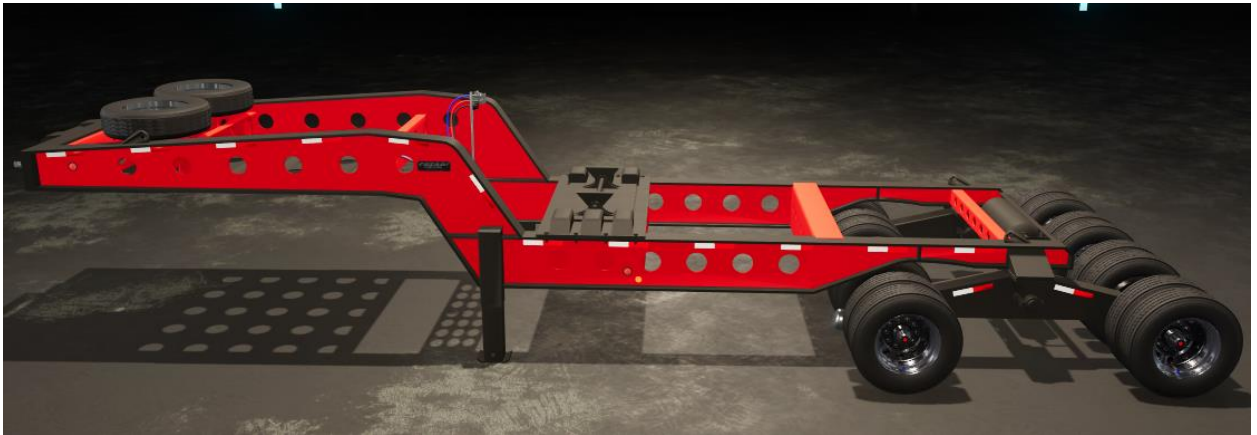

6.45 - 10.35 ft (6.45, 6.81, 7.16, 7.51, 7.87, 8.23, 8.58, 8.93, 9.29, 9.64, 10, 10.35)

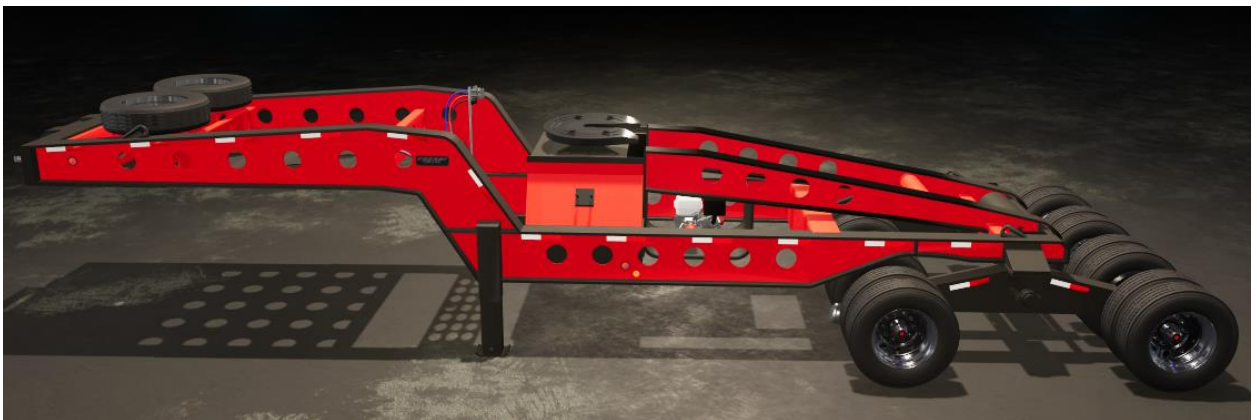

Cozad 110T Pentuple 16

Jeep Connection Options:

13 Axle Forward Bridge Attachment

Fifth Wheel Tower (for attaching directly to gooseneck)

Fifth wheel tower raises and lowers using AXIS_FRONTLOADER_ARM2 (pc lshift j/n)

Cozad 110T Pentuple 16

Trailer Functions:

Raise front tower

Select gooseneck

Use AXIS_FRONTLOADER_ARM2 (pc lshift j/n)

Raise rear tower

Select trailer

Use AXIS_FRONTLOADER_ARM2 (pc lshift j/n)

Cozad 110T Pentuple 16

Forward bridge steer

Use AXIS_FRONTLOADER_ARM (pc j/n)

Recenter forward bridge steering: use fold key/button when forward bridge is selected

Cozad 110T Pentuple 16

Aft Bridge Steer (3rd Axle Group with autosteer still functioning).

Use this to have the rear swing out more for going around turns easier or for splitting multilane/crabbing the load.

Use AXIS_FRONTLOADER_TOOL (pc k/n)

To recenter autosteer, select trailer and use fold key/button

Manually steer without autosteer 3rd axle group

Use this for fully controlling the rear for tight corners or backing up.

Use AXIS_FRONTLOADER_TOOL4 (pc lshift + lctrl + k/m) to move this little bar all the way to the center of the trailer. Once there the 3rd axle group will only steer manually. To undo this select the trailer and use the fold key/button.

Autosteer

Cozad 110T Pentuple 16

Fully Manual Steer

When the vertical box is to the left of the stationary vertical box, the 3rd axle will autosteer more quickly. Inside of the stationary vertical box and it will autosteer slower until you get to the center where it will not autosteer at all.

Last/5th Axle Group Steer

Use AXIS_FRONTLOADER_TOOLS (pc lctrl + k/m)

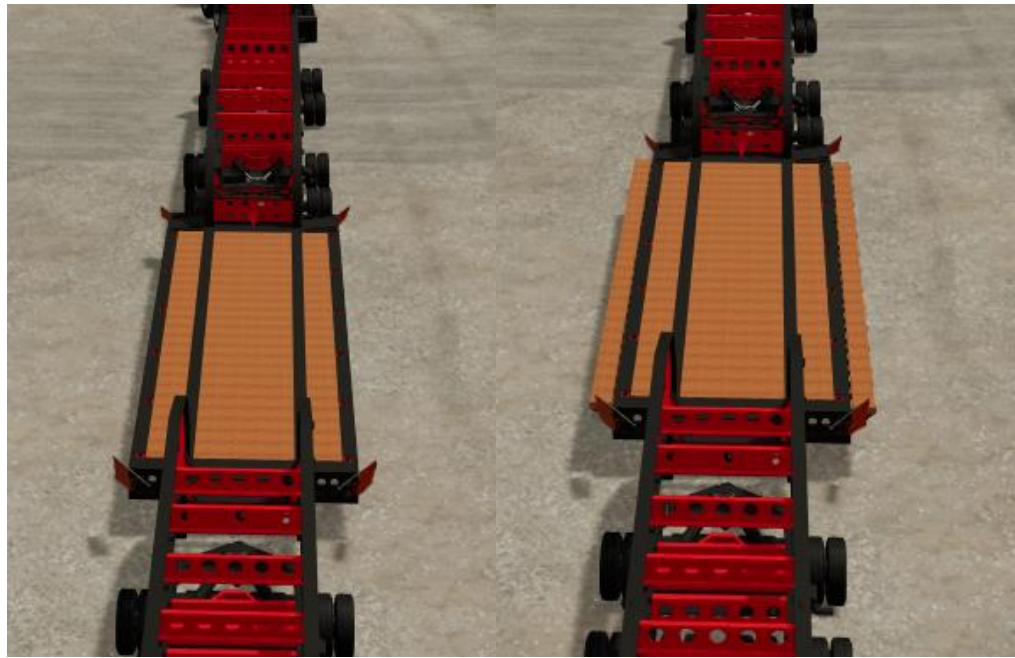

To recenter autosteer, select trailer and use fold key/button

Cozad 110T Pentuple 16

Outriggers

Use the cover key/button to show/hide

Transport

Disconnect the gooseneck from the trailer

Load Jeep, Forward Bridge, and Gooseneck onto deck

Cozad 110T Pentuple 16

Attach crane to front of deck and lift

Chain up and lower supports (AXIS_FRONTLOADER_TOOL5 (pc lctrl + k/m))

Cozad 110T Pentuple 16

Lower and detach from crane

Drive truck under and attach. Then raise landing gear. You may need to lower a little to ensure the chains show on the rear
